- SPBU standardization certification
- Pertamina internal web portal CMS
- Increase the analytics query time for Petronas analytics by 85%

Education Level

Universitas Bina Nusantara - Indonesia

Aug 2018 - Dec 2019

Masters Computer Science, 3.60/4.00

- Deep Learning for Oil Palm Fruit Ripeness Classification with DenseNet using PyTorch for neural network model for Thesis

Sekolah Tinggi Teknologi Tanjungpinang - Indonesia

Aug 2014 - Dec 2018

Bachelor of Computer Science, 3.30/4.00

Skills, Achievements & Other Experience

- **@blibli/image-cropper** (2023): Created component to crop image integrated to Blibli DLS based on vue-advanced-cropper so other teams can just use it directly by matching the UI to current systems. Lightweight UI library as all required dependencies is installed inside the project and referenced externally using Vite/Rollup build tools
- **OpenAPI Typescript Codegen** (2022): Node.js library that generates Typescript clients based on the OpenAPI specification. A fork that provides a lower level type, because each team in blibli is using different api. This will help the adoption since the team doesn't need to change the whole api implementation by just assigning the generated types to existing codebase.
- **Blitalk November 2021**  (2021): Public speaker for topic Functional Vue with Composition and Typescript. How to adopt the new vue pattern and typescript into existing project. Explain the multiple problems faced and how to tackle when adopting new technologies to current existing project
- **Deep Learning for Oil Palm Fruit Ripeness Classification with DenseNet featured on IEEE**  (2020): Research paper for image based Oil Palm Fruit Ripeness Classification using PyTorch
